Clinical Research Articles
Randomized Trial of Transcranial Direct Current Stimulation and Hearing Aids for Tinnitus Management
Giriraj Singh Shekhawat, Grant D. Searchfield, and Cathy M. Stinear

Randomized, Sham-Controlled, Feasibility Trial of Hyperbaric Oxygen for Service Members With Postconcussion Syndrome: Cognitive and Psychomotor Outcomes 1 Week Postintervention
William C. Walker, Laura Manning Franke, David X. Cifu, and Brett B. Hart

Handgrip-Related Activation in the Primary Motor Cortex Relates to Underlying Neuronal Metabolism After Stroke

Reducing Abnormal Muscle Coactivation After Stroke Using a Myoelectric-Computer Interface: A Pilot Study
Zachary A. Wright, W. Zev Rymer, and Marc W. Slutzky

Comparison of Structured Skill and Unstructured Practice During Intensive Bimanual Training in Children With Unilateral Spastic Cerebral Palsy
Marina B. Brandão, Claudio Ferre, Hsing-Ching Kuo, Eugene A. A. Ramecker, Yannick Bleyenheuft, Yo-Ching Hung, Kathleen Friel, and Andrew M. Gordon

Perceptual Relearning of Binocular Fusion and Stereoacuity After Brain Injury
Anna-Katharina Schaadt, Lena Schmidt, Stefan Reinhart, Michaela Adams, Ruta Garbacenkaite, Eva Leonhardt, Caroline Kuhn, and Georg Kerkhoff

Rest-Activity Cycle Disturbances in the Acute Phase of Moderate to Severe Traumatic Brain Injury
Catherine Duclos, Marie Dumont, Hélène Blais, Jean Paquet, Elyse Laflamme, Louis de Beaumont, Catherine Wiseman-Hakes, David K. Menon, Francis Bernard, and Nadia Gosselin

Presence of Motor-Intentional Aiming Deficit Predicts Functional Improvement of Spatial Neglect With Prism Adaptation
Kelly M. Goedert, Peii Chen, Raymond C. Boston, Anne L. Foundas, and A. M. Barrett

Assessment of Spinothalamic Tract Function Beyond Pinprick in Spinal Cord Lesions: A Contact Heat Evoked Potential Study
Jenny Haefeli, John L. K. Kramer, Julia Blum, and Armin Curt

Retraction
Retraction of “Effects of High-Frequency Repetitive Transcranial Magnetic Stimulation on Motor and Gait Improvement in Incomplete Spinal Cord Injury Patients”
